Summary

Full-stack developer with 7+ years of experience delivering scalable enterprise applications using Java, Spring Boot, and Angular. Proven track record in performance optimisation, accessibility enhancements, and end-to-end feature development.

Experience

Beckman Coulter India Pvt. Ltd. | Karnataka, Bengaluru

Full Stack Developer | 09/2021 - Present

- Designed and implemented new features to enhance application functionality and user experience.
- Developed an Angular-based on-screen keyboard supporting 18 languages, improving accessibility for diverse users.
- Designed a feature allowing the application to run in the background during tests, reducing support team wait times and saving organisational costs.
- Resolved complex challenges, including memory management, Java heap issues, network drives, physical barcode scanners and data optimisation.
- Migrated legacy databases (Dx, Xpertise) to new Cepheid OS, updating internal tools to ensure compatibility.
- Facilitated seamless migration from COS 2.0 to COS 2.1 by updating the InstallShield-based installer.
- Achieved 100% code coverage by addressing bugs identified by Coverity, ensuring a robust and maintainable codebase.
- Guided interns across projects and departments, accelerating their onboarding and productivity.
- **Technical Expertise:** Proficient in Java, Spring Boot, Angular, and Jasper Reports, delivering scalable and efficient software solutions.

Bosch Global Software Technologies | Karnataka, Bengaluru

Full Stack Web Developer | 08/2018 - 08/2021

- Designed, analyzed, and developed application modules across frontend and backend, delivering scalable and efficient solutions.
- Migrated Angular 4 code and deprecated libraries to Angular 7, improving page load speed by 30%.
- Streamlined a lighter version of the application, achieving a 60% reduction in request processing time.
- Transferred XML and JSON data to MongoDB, reducing processing time by 75%.
- Processed data from XML and JSON files, presenting it through dynamic tables, graphs, and reports.
- Implemented single sign-on and authorization using Identity Management API, Active Directory, and LDAP.
- Contributed to Docker containerization and setup using Dockerfiles and Docker Compose.
- Developed a GraphQL-based proof-of-concept interacting with Neo4j datasets, securing a key client.
- **Technical Proficiency:** Proficient in Java, Spring Boot, Spring MVC, Hibernate, Oracle DB, MongoDB, Angular, GraphQL, Neo4j, Docker, Jasper, and Plotly.

Skills

Java, Spring Boot, Spring MVC, Hibernate, SQL, Angular, Python, Perforce, Git, SVN, Jira, REST, Agile Software Development, Data Structures and Algorithms

Education

B. V. Bhoomaraddi College of Engineering & Technology | Hubli, Karnataka

Information Science and Engineering | 06/2018

CGPA: 8.52/10
